Contents of Volume 18

No. 1

G. Frankel and A. Friedmann (Israel)
Synthesis of long viral complementary DNA from 7.5 Kb poly A⁺RNA templates (JVM 00641) 1

S. Angsubhakorn, J.B. Moe, N.J. Marchette, J.R. Latendresse, N.E. Palumbo, S. Yoksan and N. Bhamarapravati (Thailand, U.S.A.)
Neurovirulence detection of dengue virus using rhesus and cynomolgus monkeys (JVM 00644) 13

G. Glikmann, M. Pedersen and I. Petersen (Denmark)
Intratypic differentiation of poliovirus strains by enzyme-linked immunosorbent assay (ELISA): poliovirus type 2 and poliovirus type 3 (JVM 00645) 25

L.M. Buthod, N.L. Schindler and H.W. Rogers (U.S.A.)
Determination of cell line suitability for rapid isolation of herpes simplex virus (JVM 00642) 37

D.J. Morris, J. Lomax, A.J. Fox and G. Corbitt (U.K.)
Comparision of dot-blot DNA hybridisation and immediate early nuclear antigen production in cell culture for the rapid detection of human cytomegalovirus in urine (JVM 00643) 47

V.S. Gouvea, L. de Castro and H.G. Pereira (Brazil)
A combined dot nitrocellulose-enzyme immunoassay for rotavirus and adenovirus (JVM 00647) 57

D.R. Dahling and B.A. Wright (U.S.A.)
Comparision of the in-line injector and fluid proportioner used to condition water samples for virus monitoring *(Short Communication)* (JVM 00646) 67

B. Ørskov Lindhardt, I.C. Bygbjerg, K. Ulrich, H. Draminsky Petersen, I. Lausen and B. Frederiksen (Denmark)
Detection of antibodies to human immunodeficiency virus (HIV) in eluates from whole blood impregnated filter paper discs *(Short Communication)* (JVM 00648) 73

No. 2, 3

G.M. Beards (U.K.)
Serotyping of rotavirus by NADP-enhanced enzyme-immunoassay (JVM 00653) 77

M.K. Ijaz, Y.G. Karim, S.A. Sattar and C.M. Johnson-Lussenburg (Canada)
Development of methods to study the survival of airborne viruses (JVM 00650) 87

G. Duverlie, M. Driencourt, C. Roussel and P. Daniel (France)
Solid phase reverse passive hemadsorption test for hepatitis B surface antigen (JVM 00651) 107

J. Husson-van Vliet, G. Colinet, F. Yane and P. Lemoine (Belgium)
A simplified plaque assay for varicella vaccine (JVM 00649) 113

W.J. Mitchell, S.E.H. Russel, D.K. Clark, B.K. Rima and M.J. Appel (U.S.A., U.K.)
Identification of negative strand and positive strand RNA of canine distemper virus in animal tissues using single stranded RNA probes (JVM 00652) 121

J.B. Mahony, S. Castriciano and M.A. Chernesky (Canada)
Cost and performance analysis of haemagglutination inhibition, passive haemagglutination, radial haemolysis, and enzyme immunoassay for measuring rubella antibody (JVM 00654) 133

K. Wetz (F.R.G.)
Cross-linking of poliovirus with bifunctional reagents: biochemical and immunological identification of protein neighbourhoods (JVM 00656) 143

M.J. Ijaz, M.I. Sabara, P.J. Frenchick and L.A. Babiuk (Canada)
Assessment of intestinal damage in rotavirus infected neonatal mice by a D-xylose absorption test (JVM 00655) 153

R.L. Ashley and J. Militoni (U.S.A.)
Use of densitometric analysis for interpreting HSV serologies based on Western blot (JVM 00657) 159

K. Okazaki, S. Chiya, S. Ideguchi and S. Kimura (Japan)
Typing of herpes simplex virus types 1 and 2 by immunoblotting analysis using polyclonal antisera to herpes simplex virus glycoproteins (JVM 00658) 169

R. Stachan and J. Drescher (F.R.G.)
Electron microscopic method for determining the concentration of influenza virus antihemagglutinin antibodies of the IgG class (JVM 00659) 179

J.M. Crance, J. Passagot, E. Biziagos and R. Deloice (France)
Continuous production of hepatitis A virus in PLC/PRF/5 cell structures: use of antigen for serology (JVM 00660) 193

Announcements 205

No. 4

G.L. Woods, A. Young, A. Johnson and G.M. Thiele (U.S.A.)
Detection of cytomegalovirus by 24-well plate centrifugation assay using a monoclonal antibody to an early nuclear antigen and by conventional cell culture (JVM 00666) 207

L.M. Galanti, C.L. Cambiaso, C.J. Cornu, M.E. Lamy and P.L. Masson (Belgium)
Immunology of hepatitis B surface antigen by particle counting after pepsin digestion (JVM 00661) 215

D.V. Gokhale and J.G. Bald (U.S.A.)
Relationship between plant virus concentration and infectivity: a 'growth curve' model (JVM 00662) 225

H. Artsob, L. Spence, F. Bishai, L. Kurjanczyk and L. Sekla (Canada)
Amplified ELISA for the detection of western equine encephalitis virus from mosquitoes in Manitoba, Canada (JVM 00663) 233

T.J. Palker, M.E. Clark, M.G. Sarngadharan and T.J. Matthews (U.S.A.)
Purification of envelope glycoproteins of human T cell lymphotropic virus type 1 (HTLV-1) by affinity chromatography (JVM 00665) 243

K.H. Rand, I. Rand, El Koussi, H.J. Houck, W. Brey, J. Rocca, T. Loftsson and N. Bodor (U.S.A.)
Trifluorothymidine:potential non-invasive diagnosis of herpes simplex infection using ^{19}F nuclear magnetic resonance in a murine hepatitis model (JVM 00667) 257

A. Afshar, F.C. Thomas, P.F. Wright, J.L. Shapiro J. Anderson and R.W. Fulton (Canada, U.K., U.S.A.)
Blocking dot-ELISA, using a monoclonal antibody for detection of antibodies to bluetongue virus in bovine and ovine sera (JVM 00668) 271

A.J. Darling, B.M. Dutia and H.S. Marsden (U.K.)
Improved method for the measurement of ribonucleotide reductase activity (JVM 00669) 281

S. Harada, N. Yamamoto and Y. Hinuma (Japan)
Clonal analysis of functional differences among strains of human immunodeficiency virus (HIV) (JVM 00670) 291

Announcement 305

Contents of Volume 18 307

Subject Index

AIDS, HIV antibody, Africa, Filter paper disc, ELISA, Immunoblotting test, 73
AIDS, HIV, Infectivity, CPE, Plaque, 291
Adenovirus, Enzyme immunoassay, Nitrocellulose, Rotavirus, Gastroenteritis, 57
Affinity chromatography, HTLV-1, Envelope glycoproteins, 243
Africa, HIV antibody, AIDS, Filter paper disc, ELISA, Immunoblotting test, 73
Amplified ELISA, Rotavirus serotype, Viral gastroenteritis, 77
Amplified ELISA, Western equine encephalitis virus, Arbovirus detection, Vector mosquito, 233
Animal model, Rotavirus, D-Xylose test, 153
Anti-HAV IgM, Hepatitis A virus, HAV propagation in vitro, Total Anti-HAV antibody, Anti-HAV antibody detection, 193
Anti-HAVI antibody detection, Hepatitis A virus, HAV propagation in vitro, Total Anti-HAV antibody, AntiHAV IgM, 193
Antibody molecule, Electron microscopy, Protein A-gold, Influenza virus, 179
Antibody, Structure, Poliovirus, Cross-link, 143
Arbovirus detection, Amplified ELISA, Western equine encephalitis virus, Vector mosquito, 233
Assay, Rubella, Performance, Cost, 133

Blocking enzyme immunoassay, Bluetongue virus, Bluetongue serodiagnosis, Dot enzyme immunoassay, 271
Bluetongue virus, Bluetongue serodiagnosis, Dot enzyme immunossay, Blocking enzyme immunoassay, 271
Bluetongue serodiagnosis, Bluetongue virus, Dot enzyme immunoassay, Blocking enzyme immunoassay, 271

CPE, HIV, AIDS, Infectivity, Plaque, 291
Canine distemper virus, Single stranded RNA probe, Single stranded DNA probe, Hybridization, in situ, 121
Carbon tetrachloride hepatitis, Trifluorothymidine, Herpes simplex virus, Herpes simplex hepatitis, ^{19}F Nuclear magnetic resonance, 257
Cell culture, Herpes simplex virus, 96-Well tissue culture plate, 37
Comparative testing, In-line injector, Fluid proportioner, Virus concentration, 67
Conventional culture, Cytomegalovirus, Rapid detection, Early nuclear antigen, 207
Cost, Rubella, Assay, Performance, 133
Cross-link, Structure, Pollovirus, Antibody, 143
Cytomegalovirus, DNA hybridisation, immediate early nucelar antigen detection, 47
Cytomegalovirus, Rapid detection, Early nuclear antigen, Conventional culture, 207

ds c DNA, Viral RNA, cDNA synthesis, 1
DNA hybridisation, Cytomegalovirus, immediate early nuclear antigen detection, 47
cDNA synthesis, Viral RNA, ds c DNA, 1
Dengue virus, Neurovirulence detection, Serological test, Monkey, 13
Dilution, Infectivity, Logistic growth model, 225
Dot enzyme immunoassay, Bluetongue virus, Bluetongue serodiagnosis, Blocking enzyme immunoassay, 271

ELISA, HIV antibody, AIDS, Africa, Filter paper disc, Immunoblotting test, 73
ELISA, Poliovirus, Intratypic differentiation, Immunoblotting, 25
Early nuclear antigen, Cytomegalovirus, Rapid detection, Conventional culture, 207
Electron microscopy, Protein A-gold, influenza virus, Antibody molecule, 179
Enteric virus, Virus aerosol, Respiratory virus, Viral aerobiological technique, 87
Envelope glycoproteins, HTLV-1, Affinity chromatography, 243
Enzyme Immunoassay, Nitrocellulose, Rotavirus, Adenovirus, Gastroenteritis, 57

^{19}F Nuclear magnetic resonance, Trifluorothymidine, Herpes simplex virus, Herpes simplex hepatitis, Carbon tetrachloride hepatitis, 257
Filter paper disc, HIV antibody, AIDS, Africa, ELISA, Immunoblotting test, 73

Flow through scintillation counting, HSV-1, Ribonucleotide reductase, HPLC, 281
Fluid proportioner, In-line injector, Virus concentration, Comparative testing, 67

Gastroenteritis, Enzyme immunoassay, Nitrocellulose, Rotavirus, Adenovirus, 57
Glycoprotein, Herpes simplex virus, Typing, Immunoblotting, 169

HAV propagation in vitro, Hepatitis A virus, Total Anti-HAV antibody, Anti-HAV IgM, Anti-HAV antibody detection, 193
HIV antibody, AIDS, Africa, Filter paper disc, ELISA, Immunoblotting test, 73
HIV, AIDS, Infectivity, CPE, Plaque, 291
HPLC, HSV-1, Ribonucleotide reductase, Flow through scintillation counting, 281
HSV-1, Ribonucleotide reductase, HPLC, Flow through scintillation counting, 281
HTLV-1, Envelope glycoproteins, Affinity chromatography, 243
Hemadsorption, Hepatitis B surface antigen, Immunoassay, Reverse passive hemagglutination, 107
Hepatitis B surface antigen, Hemadsorption, Immunoassay, Reverse passive hemagglutination, 107
Hepatitis A virus, HAV propagation in vitro, Total Anti-HAV antibody, Anti-HAV IgM, Anti-HAV antibody detection, 193
Hepatitis B surface antigen, Latex agglutination, Pepsin digestion, 215
Herpes simplex virus, Cell culture, 96-Well tissue culture plate, 37
Herpes simplex virus, Serology, Western blot, 159
Herpes simplex virus, Typing, Immunoblotting, Glycoprotein, 169
Herpes simplex virus, Trifluorothymidine, Herpes simplex hepatitis, ^{19}F Nuclear magnetic resonance, Carbon tetrachloride hepatitis, 257
Herpes simplex hepatitis, Trifluorothymidine, Herpes simplex virus, ^{19}F Nuclea magnetic resonance, Carbon tetrachloride hepatitis, 257
Hybridization, in situ, Single stranded RNA probe, Single stranded DNA probe, Canine distemper virus, 121

Immediate early nuclear antigen detection, Cytomegalovirus, DNA hybridisation, 47
Immunoassay, Hepatitis B surface antigen, Hemadsorption, Reverse passive hemagglutination, 107
Immunoblotting, Poliovirus, Intratypic differentiation, ELISA, 25
Immunoblotting test, HIV antibody, AIDS, Africa, Filter paper disc, ELISA, 73
Immunoblotting, Herpes simplex virus, Typing, Glycoprotein, 169
In-line injector, Fluid proportioner, Virus concentration, Comparative testing, 67
Infectivity, Dilution, Logistic growth model, 225
Infectivity, HIV, AIDS, CPE, Plaque, 291
Influenza virus, Electron microscopy, Protein A-gold, Antibody molecule, 179
Intratypic differentiation, Poliovirus, ELISA, Immunoblotting, 25

Latex agglutination, Hepatitis B surface antigen, Pepsin digestion, 215
Logistic growth model, Infectivity, Dilution, 225

Monkey, Dengue virus, Neurovirulence detection, Serological test, 13

Neurovirulence detection, Dengue virus, Serological test, Monkey, 13
Nitrocellulose, Enzyme immunoassay, Rotavirus, Andenovirus, Gastroenteritis, 57

Pepsin digestion, Hepatitis B surface antigen, Latex agglutination, 215
Performance, Rubella, Assay, Cost, 133
Plaque assay, Varicella vaccine, Vaccine control, 113
Plaque, HIV, AIDS, Infectivity, CPE, 291
Poliovirus, Intratypic differentiation, ELISA, Immunoblotting, 25
Poliovirus, Structure, Cross-link, Antibody, 143
Protein A-gold, Electron microscopy, Influenza virus, Antibody molecule, 179

Rapid detection, Cytomegalovirus, Early nuclear antigen, Conventional culture, 207
Respiratory virus, Virus aerosol, Enteric virus, Viral aerobiological technique, 87

Reverse passive hemagglutination, Hepatitis B surface antigen, Hemadsorption, Immunoassay, 107
Ribonucleotide reductase, HSV-1, HPLC, Flow through scintillation counting, 281
Rotavirus serotype, Amplified ELISA, Viral gastroenteritis, 77
Rotavirus, Enzyme immunoassay, Nitrocellulose, Adenovirus, Gastroenteritis, 57
Rotavirus, Animal model, D-Xylose test, 153
Rubella, Assay, Performance, Cost, 133

Serological test, Dengue virus, Neurovirulence detection, Monkey, 13
Serology, Herpes simplex virus, Western blot, 159
Single stranded RNA probe, Single stranded DNA probe, Hybridization, in situ, Canine distemper virus, 121
Single stranded DNA probe, Single stranded RNA probe, Hybridization, in situ, Canine distemper virus, 121
Structure, Poliovirus, Cross-link, Antibody, 143

Tissue culture plate, 96-well, Herpes simplex virus, Cell culture, 37
Total Anti-HAV antibody, Hepatitis A virus, HAV propagation in vitro, Anti-HAV IgM, Anti-HAV antibody detection, 193
Trifluorothymidine, Herpes simplex virus, Herpes simplex hepatitis, ^{19}F Nuclear magnetic resonance, Carbon tetrachloride hepatitis, 257
Typing, Herpes simplex virus, Immunoblotting, Glycoprotein, 169

Vaccine control, Varicella vaccine, Plaque assay, 113
Varicella vaccine, Plaque assay, Vaccine control, 113
Vector mosquito, Amplified ELISA, Western equine encephalitis virus, Arbovirus detection, 233
Viral RNA, cDNA synthesis, ds c DNA, 1
